Cruise lines to tap the Chinese market

- In the late 1990s ---Star Cruises had started building an Asian cruise holiday market .From its base in Hong Kong, the line took a step-by-step approach to unlocking the Chinese market.
- In 2006--- Costa Cruises deployed its first vessel to the Chinese market, using shanghai as its home port.
- In 2008---Royal Caribbean Cruises Ltd. today announced it is opening two new offices in China, in the cities of Beijing and Guangzhou.

The Chinese Cruise Liner

- Yangtze River Cruise Liners

- 4 liners, more than 20 cruises, mostly one week, 300-700 US dollar

The Chinese Cruise Liners

- Shanghai Wanbang: Shanghai - Mount Putuo
- Beihai Xinao: Two cruises, Beihai - Vietnam

The Chinese Cruise Liners

- China Cruises Company Limited:

found in 2011, “China Star”: 172 rooms and 395 passages, Zhoushan to Taiwan, plan to buy 4 – 5 more cruises, open service to Japan, Koran and Russia. Not formally operate yet.

The Chinese Cruise Liners

- Xiamen Global Cruise Limited
 - “Legend of the seas”, first voyage on 2011, 2000 passages, from Xiamen to Keelung. From 2012, provide regular service. Managed and operated by Royal Caribbean.

Market Trend Analysis (Scenario 1)

The per capita disposable income of China in 2020 will reach the same level of US in 1977. The number of cruise passengers account for 0.45% of total population of US in 1977. The urban population of China in 2020 will be 850 million. Further considering the deviation of consumption preference between US and China, we can estimate:

- The market size of home-port cruise will be **3.55** million.
- The market size of visiting cruise will be **0.2** million
(estimated with time series data)
- So, the total market size will be **3.75** million.

Market Trend Analysis (Scenario 2)

It is noted that when the per capita disposable income reaches 8000 US Dollar per year, the consumer is capable to afford a cruise trip. In US, 130 million people had more than 8000 US dollar disposable income per capita in 1977, the number of cruise passengers accounted for 0.8% - 4% of this number in term of years.

Based on Chinese data, we can calculate

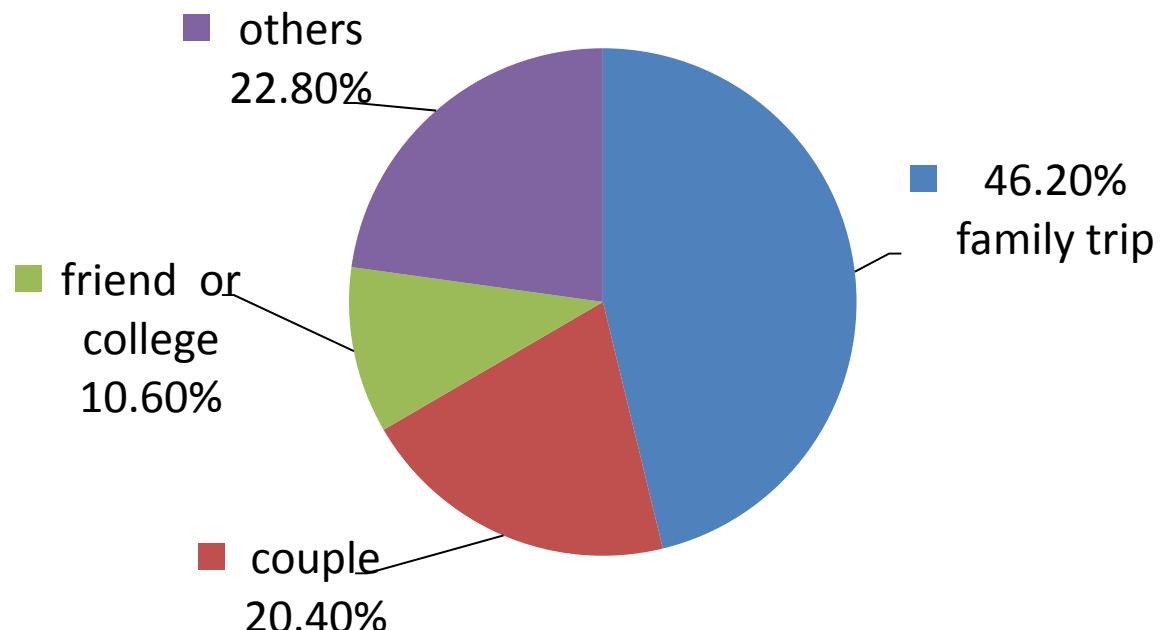

- The market size of home-port cruise will be **1.60 – 8.20** million (average **4.4** Million).
- The market size of visiting cruise will be **0.2** million (estimated with time series data)
- So, the total market size will be **4.2 million**.

Double !!!

Aimed Market and Customers

- Main stream customer group : middle or high income families
- 70% family's monthly income : more 3000 US dollars
- Main type :
Family trip 70%

How to open the potential market?

- Middle-aged customers' travelling time is limited.
- Young customers can't afford too expensive trips.
- Target customers : retired people aging from 50-69
- Reasons : No job --- sufficient time
 Certain economic base
 Safer and more comfortable way

How to open the potential market?

- Inland market
 1. More marketing ---Many people in inland China still don't know much about cruise. And the sea is something they are quite curious about.
 2. Inland lines --- coastal cities and inland cities along the Yangtze River and the Yellow River
- Longer lines--- the Caribbean and the Mediterranean

How to open the potential market?

- Lower the price??
 - In short term: it works
 - Customers who are sensitive to price enter the market
 - The number will increase
 - The quality of service will go down
 - Customers keep looking forward to low price
 - Market price will be difficult to go up again
 - In long term:
 - Customers who are not sensitive to price will leave the market
 - Overall revenues decline
 - Companies won't have enough money to update their product and service
 - The quality of service keep going down
 - Cruise industry will be in recession

Problem to be solved

- How to find potential market niche
- Policy limitation
- Business model
- Lack of management and operation personnel
- Marketing strategies
